

Stark State College – Therapy & Wellness

Project Location: North Canton, Ohio

Project Date: 2003

East Exterior

HVAC Air Distribution

Interior Therapy Equipment

Rooftop Equipment

Project Description:

A new addition to the existing Health Science Building of approximately 6100 square feet. New spaces include Therapeutic Exercise, PT and ADL Therapy as well as instructional areas.

Plumbing design included standard systems and fixtures for an instructional institution.

HVAC design consisted of packaged gas/electric Rooftop Units. De-Stratification fans were used to improve comfort in the open exercise area which had nearly floor to ceiling exterior glass. Variable Volume & Temperature (VVT) controls were used for independent temperature control of the classroom areas.
